You should look at incorporating Windows Management Instrumentation (WMI) into your application. This is a place to start:

[http://msdn.microsoft.com/library/default.asp?url=/library/en-us/wmisdk/wmi/wmi\\_start\\_page.asp](http://msdn.microsoft.com/library/default.asp?url=/library/en-us/wmisdk/wmi/wmi_start_page.asp)

Hope this helps,
