I wouldn't use maint plan for this.

As for reindex, read <http://www.microsoft.com/technet/prodtechnol/sql/2000/maintain/ss2kidbp.msp> and I suggest you apply the script you find in Books Online, DBCC SHOWCONTIG (make sure you are using the most recent update of Books Online).

As for shrink: http://www.karaszi.com/SQLServer/info_dont_shrink.asp.
