I assume you didn't protect the delete with BEGIN TRAN? If you did, just do ROLLBACK.

Are you performing regular transaction log backups? Is database in full or bulk logged recovery mode? If answers to these questions are "no", you will probably need to go to your most recent backup or just accept the data loss. If answers are "yes", you *might* be in better shape.

Anyway, I suggest you read my article on the topic at:

http://www.karaszi.com/SQLServer/info_restore_log_several_times.asp
