Hello Jim,

When I clear the Certificate in the registry, I get the error that he is unable to create a self-signed certificate.
returned erro code: 0x8009030d

Any ideas?

Tjomme

"Jivko Dobrev - MSFT" wrote:

Hi Tjomme,

The status code 0x38 in the error:

2007-03-21 15:32:19.34 Server Error: 17182, Severity: 16, State: 1.
2007-03-21 15:32:19.34 Server TDSSNIClient initialization failed with error 0xd, status code 0x38.

indicates a problem with the "Certificate" entry in the SQL Server's registry. 0xd is equivalent to ERROR_INVALID_DATA.
What you need to do to allow SQL Server to start successfully is to check and correct the "Certificate" registry entry, usually under HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Microsoft SQL Server\MSSQL.#\MSSQLServer\SuperSocketNetLib. You need to make sure that the Certificate entry is present, of type REG_SZ and either containing a valid certificate name or is cleared out.

The problem is also described in the following KB article:
<http://support.microsoft.com/?id=900497>

"Tjomme Vergauwen" wrote:

Hello Peter,

This is the complete log.
I have another more detailed log in the file C:\Program Files\Microsoft SQL Server\90\Setup Bootstrap\LOG\Hotfix\SQL9_Hotfix_KB933508_sqlrun_sql.msp.log

This one is too big to post here.
If it can help, I gladly send it to you via e-mail.

Regards,
Tjomme

I discussed with folks on my team and it looks to be the problem described here:
http://blogs.msdn.com/sql_protocols/archive/2005/10/31/487090.aspx

Thanks,
Peter Sadow – Microsoft

Hello,

Some extra remark: I installed the servicepacks when I was disconnected from the network. Could this have something to do with it?

wrote:

Hello,

When upgrading SQL Server 2005 with SP2 (KB921896), the Database service upgrade failed. Same problem when applying the fix (KB933508). Now I'm unable to start the service all together... So I currently have no database anymore.

Re: SQL Server 2005 SP2 fails in upgrading Database service

Uninstall
does only
work for the
fix, not for
SP2...

I've
included the
summary
dump and
errorlog
dump for
analysis.
More logs
available at
request.

Thanks for
the help!
