Hello,

The creation date will be always based on the date time on the SQL Server machine.

Thanks  
Hari

Hi,

when i create a new user in a .MDF file, the hour of creation in the field "createdate" of table "membership" is exactly 2 hours less than the time of my computer. Probably something to do with different hours between Europe and UK or ...

How can i set the creation hour to exact the same hour of my computer?

Thanks  
Dan
