Hello Kevin,

There's a solution in the following link and it seems from the posts that it works:
<http://forums.microsoft.com/MSDN/ShowPost.aspx?PostID=392835&SiteID=1>

It'd be good if you feedback.

I'm getting this error now trying to re-install sql server 2005 database and reporting services. I had it installed ok and it was working fine. i then decided to try out sql server 2008 rc0. i'm not sure the uninstall cleaned up correctly. anyway, i was able to get some of the product re-installed but not all of the righ parts. here's the error:

SQL Server Setup could not connect to the database service for server configuration. The error was: [Microsoft][SQL Native Client]Encryption not supported on the client. Refer to server error logs and setup logs for more information. For details on how to view setup logs, see "How to View Setup Log Files" in SQL Server Books Online.

For help, click:

<http://go.microsoft.com/fwlink?LinkID=20476&ProdName=Microsoft+SQL+Server&ProdVer=9.00.1399.06>

This link is useless. here the link info:

Re: Error re-installing SQL Server 2005

We're sorry

There is no additional information about this issue in the Error and Event Log Messages or Knowledge Base databases at this time. You can use the links in the Support area to determine whether any additional information might be available elsewhere.

how do i resolve this issue? i don't see where the sql native client can be configured.

thanks for you help.
