Hello everyone,

We are looking for beta-testers for our new product – Scribe Report Generator. At the moment, Scribe supports 5 relational databases, including MS SQL Server 2000, Sybase and Oracle.

Very briefly: Scribe is written in Java, is based on visual programming and can be extended by adding user-written Java classes; it comes with the API library to let other Java-based apps run Scribe reports programmatically.

The details are on our website: www.gestalt.com/Scribe (temporary location).

User: guest

Password: star

We offer a free license to everyone who provides us with a feedback on bugs, inconsistencies, or constructive criticism that helps us refine Scribe.

Please respond to: scribe@gestalt.com

Regards,

Alex Molochnikov
