1: Seems this article is for you: <http://www.sqldbatips.com/showarticle.asp?ID=27>

2: Using the RESTORE command.

I use MS SQL Server Express 2005 (the 'unpaid' version). I managed to create a backup of my database using an option under 'Server Objects'. My questions:

1. Is it possible to schedule this backup or is this only a feature of the full version of MS SQL Server?
2. How can I restore a database from a backup?

Any help is appreciated.
