Hi Kevin,

Thank you about your answer.

My problem is a bit different. I don't trying to use JavaScript to get form authentication cookies. I try write and read other things to cookie. For example size of left frame. And I will able size the frame to last width.

I use this JS code:

```
///*****  
function GetCookie(Name)  
{  
var search = Name + "="  
var returnvalue = "";  
  
if (document.cookie.length > 0)  
{  
offset = document.cookie.indexOf(search)  
  
// if cookie exists  
if (offset != -1)  
{  
offset += search.length  
// set index of beginning of value  
end = document.cookie.indexOf(";", offset);  
// set index of end of cookie value  
if (end == -1) end = document.cookie.length;  
  
returnvalue = unescape(document.cookie.substring(offset, end))  
}  
}  
return returnvalue;  
}  
  
function SetCookie (name, value)  
{
```

RE: I cannot read cookie because of ASP.NET Forms Authentication c

```
var argv = SetCookie.arguments;
var argc = SetCookie.arguments.length;
var expires = (2 < argc) ? argv[2] : null;
var path = (3 < argc) ? argv[3] : null;
var domain = (4 < argc) ? argv[4] : null;
var secure = (5 < argc) ? argv[5] : false;

document.cookie = name + "=" + escape (value) +
((expires == null) ? "" : ("; expires=" + expires.toGMTString())) +
((path == null) ? "" : ("; path=" + path)) +
((domain == null) ? "" : ("; domain=" + domain)) +
((secure == true) ? "; secure" : "");
}
//*****
```

```
// And I use this code to read-write sample:
var expdate = new Date();
expdate.setTime(expdate.getTime() + (24 * 60 * 60 * 1000 * 365));
SetCookie("SenolTestCookie", "cookie test", expdate, "/", "TEST.TEST",
false);

alert(GetCookie("SenolTestCookie"));
alert(document.cookie);
```

The 2 alert shows me empty on my application. I tried this code on another web site which is not asp.net (only HTML) it runs successfully.
