> *the script example I posted uses a "WScript.Echo" statement for every  
property that is shown. If you want to have the output in CSV format, you  
put the properties in one line and separate them by comma or semicolon.  
Here's an example, just giving the "output":*

>

> *WScript.Echo objQuickFix.CSName & ";" & objQuickFix.Description & ";" &  
objQuickFix.HotFixID*

>

> *If you want to write the output to a file, use code like the following:*

>

> *Set objFSO = CreateObject("Scripting.FileSystemObject")*

> *Set objOutputFile = objFSO.CreateTextFile("C:\Hotfixes.log")*

> *objOutputFile.WriteLine objQuickFix.CSName & ";" & objQuickFix.Description  
& ";" & objQuickFix.HotFixID*

>

> *Hope this helps :=)*
