Like this !

```
*****  
sSource = "http://www.assoft.com.au/images/headpic.gif"  
sDest = "test.gif"  
  
set oHTTP = WScript.CreateObject("Microsoft.XMLHTTP")  
  
oHTTP.open "GET", sSource, False  
oHTTP.send  
  
tStart = timer()  
set oStream = createobject("adodb.stream")  
Const adTypeBinary = 1  
Const adSaveCreateNotExist = 1  
Const adSaveCreateOverWrite = 2  
oStream.type = adTypeBinary  
oStream.open  
oStream.write oHTTP.responseBody  
oStream.savetofile sDest, adSaveCreateOverWrite  
set oStream = nothing  
tElapsed = timer() - tStart  
  
set oHTTP = nothing  
  
WScript.Echo "Done! " & tElapsed & " seconds..."
```

```
*****
```
