If looking for documentation on the net classes themselves  
look here:

[http://msdn.microsoft.com/library/default.asp?url=/library/en-us/cpref/html/cpref\\_start.asp](http://msdn.microsoft.com/library/default.asp?url=/library/en-us/cpref/html/cpref_start.asp)

(haven't found the doc on the `_interfaces_` to the classes,  
but it may be safe to assume the the interfaces to the classes  
will closely reflect the members of the classes themselves).

cheers, jw

Uh-oh. I spoke too soon.

The typelibs are here (at least some of them):

C:\WINDOWS\Microsoft.NET\Framework\v1.1.4322

Here are the typelibs I found:

Microsoft.Vsa.Vb.CodeDOMProcessor.tlb  
Microsoft.Vsa.tlb  
Microsoft.JScript.tlb  
System.Drawing.tlb  
mscorlib.tlb  
msconlib.tlb

## Re: Sorting strings in vbscript

```
System.tlb  
System.EnterpriseServices.tlb  
System.Windows.Forms.tlb
```

and that last one hints of a new way to get at a respectable  
gui from script???

cheers, jw
