I don't have something like this done already but looks like you'll have to query AD for the computers.

<http://www.microsoft.com/technet/scriptcenter/scripts/default.aspx?mfr=true>

Get local users only

<http://www.microsoft.com/technet/scriptcenter/scripts/default.aspx?mfr=true>

or

Get local groups and its members

<http://www.microsoft.com/technet/scriptcenter/scripts/default.aspx?mfr=true>

Mike wrote:

Ideally I would like to search all computers that are in AD and find all local user accounts that are installed in all machines and output it with their permissions to a .csv file.

Anyone have anything like this already done?
