-

syntax is

```
net use f: \\server\share
```

Notice the space between the drive name and the path.

Thomas wrote:

does anyone have any knowledge with logon scripts?

I have created a .bat file and used the following syntax

```
net use f: \\server\filename
```

i have placed this in the profile of the user and also placed it in the sysvol netlogon folder on the server and when the user logs on it does not work.

do i need the quotation marks? any ideas? thx

.
