<URL:<http://www.merlyn.demon.co.uk/js-date2.htm#IM>>

Does not work for me, because IE6 is standard for this company Intranet.

It worked for me in IE6, which I no longer have, and works in IE7, Opera 9, & Firefox 2. Safari 3.1 sets document.lastModified to an empty string.

<URL:<http://www.merlyn.demon.co.uk/vb-date2.htm#IM>> may help you.

Get's the error "types incompatible" for your CDate - example. No option for me.

Similarly for IE6 & IE7.

Your real name being Jörg Trumpfheller, I suspect that you, and your operating system, may have German locale. Could it be that your document.lastModified is localised in a manner incompatible with new Date("...") and CDate("..."), where the American dialect is expected?

But entering by hand the date that will be of significance to the reader is better, because it allows surreptitious spelling corrections.
