Thank you to all three experts that replied.  
An answer to some of the questions that you asked.

OS – XP Pro – No Connections to the Internet – no updates done.  
Session = Admin  
Started from a "Scheduled dotBAT file" once a day in the quiet hours – no other users.

Date Modified on the dotVBS file is 26 months ago.

Will try slowly building up from small two line program.

Any idea what the error Code means ?????

Pete (Northolt UK)

Hello Pete,

Few questions to understand the context ;)

1. What kind of session do you have ? Admin or guest?
2. How do you start the script ? double click or cmd prompt ?
3. Did you install an update or something since you have this error message ?
