-

I tried to install couple of the applications that I downloaded from <http://www.microsoft.com/technet/prodtechnol/sppt/wssapps/default.mspix>, but I ran into problems. I was able to load the templates but after I applied the template to a new site definition I created (Copied the STS, copied and edited webtemp.xml). But after I loaded the template, I tried to Relink the Forms, I was not able to find them in order to reload them.

Can anyone help?

Gladys I. Rodriguez
