Have you tried holding down the "Shift" key whilst selecting the document?

Nigel.

> When viewing (not editing) a document from the document library, it opens the document in the same screen (so no new screen, so you would have an intranet-page and the document-page). But users (and me 2 ;) often close the document window, instead of using the back-button. Then the whole intranet is closed down, and you have to start internet explorer again and navigate to the site again.
