DS, Thanks for the reply – ultimately, I'm looking for an associated list of all the properties which are loaded in the "Manage properties of crawled content" page.

I can see the list of 200 + properties, but have only found what a handful apply to. (I've looked at some of the page source code and opened the schema files, but this didn't seem to offer a useful one on one connection.) ... Any ideas would be very appreciated.

.
