The indexes are ones that I created myself. One index Source Group is Portal Content and the other is Non-Portal Content. No entries in the logs. I have tried deleting and re-creating the indexes, still no luck.

Wait a minute. There are already index files for Portal and non-portal content. You should be looking at the document counts for those sources which, by default, get posted on a page already. Are you not seeing document increases in the non-portal content display when you add documents to your site? If not, then it is likely that you don't have Alerts and the timer service running, as that is what kicks off the search indexing processes.
