No I haven't. I'm really hoping that a MS MVP or someone else who encountered and solved this issue will come to our aid. I'm almost ready to uninstall/reinstall the bits in hopes that it will correct the issue, but, that doesn't seem like a good option.

How about an Ex-MVP. Below are the hits I get on my blog site, which is a free-form FAQ created from previous posts that have worked for someone--when I search on my message title. Follow the links and see if one works for you.
