STS 1.0 does not include workflow.

There are possibly third-part products that provide workflow for STS 1.0, but the product itself does not do so. [The same situation applies to WSS]

If you have any more general STS 1.0 questions please post them in the main newsgroup microsoft.public.sharepoint.teamservices rather than in the CAML subgroup.

Thanks.

> *I have SPTS installed on a Windows 2000 Advanced Server running SQL Server 2000 for the database system.*
> *For a development platform, I have SPTS installed on a Windows XP Professional box running the MSDE (version 7 I believe) version that is installed by default by the SPTS setup program.*
> *For development tools, I have FrontPage 2002, Visual InterDev 6.0, and SQL Server 2000 Enterprise Tools.*
> *Our office will be upgrading to Office 2003 in the near future. If I don't HAVE to purchase a copy of Office XP Developer Edition, obviously, I want to avoid it. Will any of the tools I currently have available (listed above) allow me to create a Workflow application in SPTS or will a copy of Office 2003 Professional enable that for me?*
> *We do have Windows 2003 Server, however at this point we cannot migrate to IIS 6 and Windows SharePoint Services because we use a version of Crystal Reports that does not function on IIS 6 and it's not in the budget to run two web servers for the intranet, so I am limited to using a 2000 Server box running IIS 5.*
