Hello Ryan,

You can add a new Calculated column that shows just the date portion of the

Begin field:

Modify settings and Columns > Add a new column

Column Name: BeginDate (or whatever)

Type: Calculated

Description: (whatever)

Formula: [Begin] (just double click Begin)

Data type returned: Date and Time

Date and Time Format: Date Only

Add to default view: (up to you)

Then modify the view to include your new BeginDate column instead of Begin.

HTH
