Hi All,

hope there is someone, out there, that is able to give me some assistance and expertise.....

i've successfully installed wss 3.0 and then run the sharepoint products and technologies configuration wizard.

o/s SBS 2003 prem (with all service packs and security updates insitu)

I'm trying to upgrade wss version 2 (service packed) to wss v 3.0 beta 2 without success.

"Failed to initiate the upgrade sequence. An exception of type System.Data.SqlClient.SqlException was thrown. Additional exception information: Directory lookup for the file "C:\Program Files\Microsoft SQL Server\MSSQL\$SHAREPOINT\Data\STS_jca1_4.mdf failed with the operating system error 5(error not found)."

i have an excerpt from the error log:

```
