\viewkind4\uc1\pard\lang2052\f0\fs20 Hello,

\par

\par Current version of WSS supports to define access security on a form library. For example, we can specify a user with "Add List Items, Edit List Items, Delete List Items", but we cannot choose only one of them. ("view" is the very best permission on a form library, if a user can access the form library, we will be able to view all forms in it).

\par

\par To get around the issue, you may consider seperating the form library to multiple ones, with different security policy, so that a particular user can access one, but not with another.

\par

\par Sincerely,

\par

\par Luke Zhang

<http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>.

\par

\par Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at <http://msdn.microsoft.com/subscriptions/support/default.aspx>.
