-

This is the WSS newsgroup and thus not the place for MOSS questions (which this must be as there isn't an Enterprise version of WSS 3.0)

Send MOSS Installations and Admin questions to

microsoft.public.sharepoint.setup_and_administration

(or to the old "defunct" SPS newsgroup =
microsoft.public.sharepoint.portalserver)

where you will probably get answers faster.

Mike Walsh

WSS FAQ: www.wssv3faq.com / wss.collutions.com

No private questions please (additions to FAQ welcome)

Hi,

I keep getting this error post fresh install with the 2007 Config Wizard
??

Any idease how to fix ?? Rebooting etc hasn't helped.

Event Type: Error

Event Source: SharePoint Products and Technologies Configuration Wizard

Event Category: None

Event ID: 104

Date: 5/02/2007

Time: 9:50:36 AM

User: N/A

Computer: DBHOTSITE2006

Description:

Failed to register SharePoint services.

An exception of type System.Runtime.InteropServices.COMException was
thrown.

Additional exception information: Class not registered

Re: Problem installing SharePoint 2007 Enterprise

System.Runtime.InteropServices.COMException (0x80040154): Class not registered
