Greetings,

Does anyone know if there is a source to pull in information about a user? I want to default some fields on a form and was planning to use AJAX to lookup the information about the user, e.g. lwho their manager is.

Something comparable to when you use `"/_vti_bin/owssvr.dll?Cmd=Display&List={xxxx-xxx-xxx}&XMLDATA=TRUE"`

But to pull information about the user currently logged in, or even a specified user.

Is this possible?

Thanks,
-SJ
