

WSS FAQ additions and corrections – 11th – 17th May 2008

Source:

<http://www.tech-archive.net/Archive/SharePoint/microsoft.public.sharepoint.windowsservices/2008-05/msg00217.htm>

- *From:* Mike Walsh <englantilainen@xxxxxxxxxxx>
 - *Date:* Sat, 17 May 2008 12:09:18 +0300
-

Note: All of the addresses of the KB / Articles – 2007 Products / MS / Non-MS Articles below were valid at the time I added them to the WSS FAQ site and to this file. I can't guarantee that they still are.

(This is also posted to my blog at <http://mikewalsh.bilsimser.com>)

(Items are added to the WSS FAQ throughout the week so you will find new items more quickly by checking at wss.collutions.com or www.wssfaq.com daily.)

From 11th – 17th May 2008

NOTE: Amendment to KB articles: Microsoft are not not amending the date of a KB article if the change made is marked as a version point change (so from 2.2 to 2.3 for instance).

This ought to mean that the amendment made is cosmetic rather than important as important text changes ought to result in a major version change (such as from 2.2 to 3.0).

Because of this change and to avoid unnecessary effort I will in future not amend the listings in the WSS FAQ sites if only a minor version change has taken place.

I will continue to amend both the date and version numbers of major version changes and of course will continue to add all relevant new KB articles that my RSS feeds and other sources give me.

I.1 2007 KB Articles (*now only one section for WSS and MOSS*)

New

<http://support.microsoft.com/kb/952167/en-us>

Folders may have to be excluded from antivirus scanning when you use a file-level antivirus program in Windows SharePoint Services 3.0 or in SharePoint Server 2007
