SUMMARY

* Over Seven years of experience in analysis, design, development, testing and maintenance of object-oriented, client-server multi-tier web applications.

* More than Three and half years experience as a SharePoint Developer in installing, configuring, developing and administering Microsoft Office SharePoint Server 2007 (MOSS 2007) with Windows SharePoint Services 3.0 (WSS 3.0) and Microsoft SharePoint Portal Server 2003 (SPS 2003) with Windows SharePoint Services 2.0 (WSS 2.0) and more than four years experience as .NET Developer in designing and implementing WebPages using Visual Studio in C#.NET, XML, ASP.NET, Web Services, SQL, ADO.NET.

* Hands-on experience in designing and implementing various SharePoint Web Parts, event handlers, Features, Workflows, Content Types, custom Document Libraries and Lists.

* Strong proficiency in designing and developing InfoPath 2003/2007.

* Working Knowledge of SharePoint Designer.

* Experience in Architecting, Designing and Deployment of High-Performance, Scalable, Distributed web and windows applications using Microsoft Technologies and SQL Server 2005.

* Extensive experience in design and development of applications using .NET Framework, ASP.Net, C#, XML, HTML, DHTML, IIS, JavaScript, VSS, JavaScript, SQL-Server 2000/2005, Oracle 9i/10g, SQL, T-SQL.

* Hands on experience in developing the business logic using C#.Net

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

- * Good experience in database design and development in writing SQL Queries, Stored Procedures Extended Stored Procedures and Triggers.

- * Well experienced in the full Software Development Life Cycle (SDLC).

- * Source Code Control Systems like Microsoft Visual Source Safe 6.0.

- * Well versed in Object Oriented Design & Development using .Net technologies.

- * Highly dedicated, quick starter, solution driven pattern programmer, Strong in Object Oriented Analysis and Design, Excellent at solving complex problems under strict deadlines.

TECHNICAL SKILLS

SharePoint Technologies: Microsoft Office SharePoint Server 2007 (MOSS 2007), Microsoft SharePoint Portal Server 2003 (SPS 2003), MS SharePoint Designer 2007, MS InfoPath 2003/2007

Application Server: IIS 5.0/6.0

Languages: C++, C, PL/SQL, C#.NET

Databases: MS-SQLServer2000/2005, ORACLE8i,

MS Access 2000 and Visual SourceSafe 6.0

Development Tools: Visual Studio.Net 2005/2008, Visual Studio .Net 2003

Middleware: ADO.Net, ADO, ODBC, OLE DB,

COM, DCOM, ActiveX and MTS

Operating System: MS Windows 95, 98, NT, 2000, 2003

Technologies: Active X, COM/DCOM

Web Technologies ASP.NET 1.1/2.0, HTML, XML, Web Services, AJAX, CSS

EDUCATION

? Master of Science in Computer Systems Engineering from University Of East London, UK.

? Bachelor of Engineering in Computer Science and Engineering from Madurai Kamaraj University, India.

PROFESSIONAL EXPERIENCE

Capital One, Richmond,
VA

OCT2008 –Till Date

SharePoint Developer

Capital One is a diversified financial services company offering a broad array of credit, savings and loan products to customers in United States, UK and Canada. SharePoint is being used to provide team

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

workspaces, enable discussion threads to foster knowledge sharing and communities of practice, and integrate with MS–Office to improve usability of desktop.

Responsibilities:

- * Installed and configured WSS 3.0 and MOSS 2007 across a medium server Farm including Database Server and Search server.
 - * Developed Features to add Custom Menu items to Site Actions menu.
 - * Involved in integrating SharePoint with Single Sign–On (SSO).
 - * Created SharePoint web parts using Visual Studio 2008 with Microsoft SharePoint and Microsoft SharePoint web part pages object model.
 - * Created workflows on Lists and Document Libraries using SharePoint Designer 2007.
 - * Customized and branded SharePoint sites to adhere to the business standards.
 - * Extensively worked on Data view web part.
 - * Deployed features using stsadm.exe tool at different levels including web application, site collection and site level.
 - * Involved in documenting governance model along with senior managers to ensure sites are owned and managed by SharePoint team and to put controls in place to prevent users from accessing features that do not comply with Capital One standards and approaches.
 - * Involved in full development life cycle right from requirement gathering till site is up and running in production.
 - * Involved in day–to–day activities including customer interaction to provide end user training, making changes to existing sites.
- Environment: Microsoft Office SharePoint Server 2007, WSS 3.0, Visual Studio 2008 with C#, C#.NET, ASP.NET 2.0, MS–InfoPath 2007, Visual SourceSafe 2005, Windows Server 2003, ADO.NET 2.0, IIS 6.0, SQL Server 2005, HTML, DHTML, XML, XSLT.

Bank of America, Greensboro,
NC
NOV2007 –AUGUST 2008
SharePoint Developer

Bank of America has various financial departments handled by various divisions in the company. For automation of various manual processes Share Point Portal Server 2007 was used for centralized maintenance of customer information. Creating a single place to update project data is a goal of the portal that will allow for a stream lined way to keep management and team members informed of a projects status

Responsibilities:

- * Installed WSS and SharePoint Portal Server 2007
- * Configured searches for the SharePoint Portal Server
- * Developed custom forms using InfoPath 2007 and published into SharePoint forms library
- * Developed Features to add Custom Menu Items to SiteActions Menu and

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Activate Event Handlers

- * Involved in creation of site columns and adding Content types to SharePoint Lists and Document Libraries.
 - * Created SharePoint sites, subsites, Document Libraries, Lists to collaborate the Affiliates
 - * Provided support to developers for new SharePoint application development and deployment
 - * Participated in setting-up of Back-Up System for MOSS 2007 sites.
 - * Worked extensively with VS.NET, ASP.Net controls such as GridView and calendar
 - * Customized SharePoint sites by changing layout and themes using C# and SharePoint Object Model and involved in creation of Site Templates.
 - * Worked on queries, stored procedures and triggers in SQL Server 2005.
 - * Responded to end-user questions, concerns, and requests
 - * Supported and trained end users on WSS and SharePoint Portal Server,
 - * Developed Knowledge based articles for users and staff
 - * Actively worked with end-users to define document requirements, for designing, developing and testing solutions to resolve them
- Environment: Microsoft Office SharePoint Server 2007, WSS 3.0, Visual Studio 2008 with C#, C#.NET, ASP.NET 2.0, MS-InfoPath 2007, Visual SourceSafe 2005, Windows Server 2003, ADO.NET 2.0, IIS 6.0, SQL Server 2005, SQL Server Integration Services, HTML, DHTML, XML

Citibank, Warren,

NJ

JUNE2006 – OCT2007

SharePoint Developer

Project: IT Support and Maintenance

Project involved building a collaborative intranet portal using Microsoft Sharepoint products and technologies. Designed and developed departmental sites using Windows Sharepoint Services and provided document management and knowledge management capabilities. Involved migrating legacy applications from ASP to .Net platform and integrating with the portal.

Responsibilities:

- * Analysis of the requirements
- * Involved in the study of legacy systems
- * Created Sharepoint webparts using Visual Studio 2005 with Microsoft.sharepoint and Microsoft.sharepoint.webpartpages object model
- * Design of custom forms using InfoPath and responsible for publishing to test environment forms library
- * Developed Features to add Custom Menu items to Site Actions menu and activate EventHandlers
- * Developed solutions to deploy the developed objects to production server
- * Involved in designing of content types for document libraries
- * Created Sharepoint Workflow using Sharepoint Designer

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

- * Created workflows on Lists and Document libraries
- * Designed custom application pages
- * Created user controls to be used in custom application pages
- * Implemented error handling to deal with inevitable errors that pop up in application
- * Maintained design requirements documentation with accurate information sharing
- * Developed unit test cases and executed them
- * Prepared training material presentations and related documentation to use for the team
- * Post–release maintenance, bug fixing and adding new features based on user requests

Environment: Windows 2003 Server, SPS 2003,Microsoft Office SharePoint Server 2007,C#, CSS, ASP.NET, ADO.NET, HTML, XML, MS SQL Server 2005, IIS , Visual Studio .NET 2005, XML

Glaxo Smith Kline, Durham, NC

FEB2005 – MAY2006

SharePoint Developer

Project: Integrated Business Environment Solutions and Tools

As a SharePoint Developer, I was responsible for designing and implementing SharePoint environment. Provided Site administration services for existing SharePoint sites including permissions and management of Custom developed Web Parts. Installed and activated features, developed and maintained additional features in SharePoint 2003. Provided post production support for the newly upgraded SharePoint sites and site collection.

Responsibilities:

- * Analysis of the requirements
- * Created SharePoint Web Parts using Visual Studio 2005 with Microsoft.SharePointandMicrosoft.SharePoint.Webpartpages object model
- * Developed custom forms using InfoPath 2003 and publish into SharePoint 2003 forms library
- * Administration of the SharePoint Portal 2003. Create, Design and Configure the team rooms as per the team's collaboration requirements
- * Involved in designing of Content Types for Documents libraries
- * Created SharePoint sites, sub sites, Document Libraries, Lists to Collaborate the Affiliates
- * Created various Workflows on document libraries
- * Integrated SharePoint events with Microsoft Outlook2003 to notify employees of events through their calendar
- * Maintained design requirements documentation with accurate information sharing
- * Prepared training material presentations and related documentation to use for the team
- * Plans, schedules and performed proactive maintenance, including software upgrades and patch installation

Environment: MS SharePoint Portal Server 2003 (SPS 2003),Windows Server 2003, Visual Studio 2005 with C#, ASP.NET 2.0, MS–InfoPath

2003, Active Directory, Visual Source Safe 6.0/2005, ADO.NET, IIS 5.1/6.0, SQL Server 2005, HTML, DHTML, XML

Wellmark Blue Cross Blue Shield, Des Moines, IOWA JUN2004 –JAN 2005
Senior .NET Developer
Project: Under65

Blue Cross and Blue Shield brands are the nation's oldest and largest family of health benefits companies and the most recognized brands in the health insurance industry. Under65 is a web based project that can be used by a customer, agent or farm bureau personnel to get health insurance. This application was developed to substitute the paper application process. It consist of two modules

* E–Application

User can log on to the application and apply for health insurance. User can answer set of questions and the system generates the best plan suitable to his needs, also gives him a choice to select a plan, fill in the details and apply online.

* Enrollment and tracking

Used internal to the organization to keep track on all application and process them. Consist of sub applications like logical person identity, generating APRs, generating offer letters, Generating amendments based on the business rule

Responsibilities:

* Designed, developed user interface look and feel and functionality for web users using HTML, XML, XSLT, ASP.NET and C#.NET.

* Used Microsoft application blocks to connect database.

* Developed web forms are using C# and visual studio 2005 with master page concept, XML XSLT, typed dataset, XPATH

* Involved heavily in developing the middle tier using ADO.NET to get the Data

Specific from Data Layer from SQL Server database

* Extensively Worked with SQL Server to create the users, tables, indexes, User defined functions, and stored procedures.

* Prepared unit test cases and performed unit testing of the module

* Extensively used Datasets for accessing data from the database.

Environment: Windows2003, Visual Studio2005, ASP.NET, C#.NET, Web Services, XML, XSL and SQL Server 2005

Lutron Electronics, Allentown, PA
SEP2003–MAY2004

Senior .NET Developer

Project: E–Care

The E–care Customer service application was developed for the use of Customer Service representatives. When a customer calls, the telephone number is passed to this application, which in turn matches the telephone number and fetches the customer's information from the database, and performs various operations like inserting or updating

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

the customer's data based on the Business logic. Various levels of access are provided for supervisors and floor managers. The application utilizes most of the available .Net tools provided by Microsoft, including C#, ASP.NET, ADO.NET, Microsoft SQL Server 2000, IIS, and Windows 2000.

Responsibilities:

- * Developed GUI front end using Windows forms in C#.NET
- * Designed user interface screens and implemented application logic under Microsoft .NET framework using C#.NET to use .NET features powered with CLR.
- * Created class diagrams and sequence diagrams using UML.
- * Worked with User Controls.
- * Programmed ADO.NET for communication between application and database.
- * Extensively used Data Grid, Data Set, Data Table, Data Adapter and Data Readers
- * Created stored procedures, Views, Cursors, Indexes and Triggers by using T-SQL.
- * Used XML, XSLT and JavaScript.
- * Used .NET Remoting to access objects.
- * Used data views for filtering the data.
- * Exceptions are handled while taking inputs from the users.
- * Involved in managing project using Microsoft Visual SourceSafe 6.0.
- * Implemented role based security for the user groups.
- * Designed and Implemented Reports using Crystal Reports & ASP.NET.
- * Prepared documentation for the above modules

Environment: Visual Studio .NET 2003, C#.NET, ASP.NET, ADO.NET, SQL Server 2000, IIS, UML, Visual SourceSafe, Windows2000.

UPS, Lexington,

KY

JAN2003 – AUG2003

..Net Developer

Project: BOSS (Brokerage Operations Support system)

To support the Brokerage Operations, UPS developed an Application named BOSS (Brokerage Operations Support system). Each country will use BOSS and develop applications, reports and business rules as per the local specifications.

Responsibilities:

- * Collected requirements from the integrators (users) and developed use cases.
- * Developed design documents for application and reports.
- * Designed the database architecture.
- * Developed applications with the Denmark specifications and rules, using C#.NET and ASP.NET.
- * As per the requirement interfaces are designed using C#.NET.
- * Involved in writing local business rules for Denmark using C#.NET.
- * Involved in writing client side validations using Java Script.
- * Several existing Components are modified as per the requirement

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

Available share point developer consultant for your clients. projects. In vargina,. are any other locations in us.

- * Actively involved in testing the applications on different operating systems like Windows NT, Windows 2000.
- * XSLT was used for the transformation of data from XML to HTML
- * XML was used for the transportation of data
- * Created public Assemblies to implement business logic and Web Services were employed to integrate necessary applications.
- * Written various Stored Procedures in Oracle.
- * Worked with Indexes and Views for Database tuning.
- * Converted all the Queries that are used in the current application into stored procedures to increase the performance
- * Developed reports like Managerial Reports, General Reports, and Accounting Reports using Crystal Reports.
- * Documented the Reports and Application.

Environment: C#.NET, ASP.NET, ASP, IIS, XML, Crystal Reports , Oracle, PL/SQL, SQL, Windows NT, Windows2000.

Impact SystemsLtd,

UK

APR2002 –DEC2002

Junior .NET Developer

Project: Electronic Communication and Secured Messaging (ECSM)

To provide secure messaging solutions to the customers using Electronic Communication and Secured Messaging (ECSM).This application will enable CSC Financial Services to address its customers who are using this service as a virtual e–mail system with secure means of communication.CSC Financial Services Ltd is unique to itself in time–tested ability to plan, build and operate reliable, efficient and secure business solutions for leading financial services firms around the world.CSC's financial services clients around the world include more than 1,200 major banks, healthcare organizations, insurers, reinsures, and investment management and securities firms.

Responsibilities:

- * Work involved designing user interface.
- * Responsible to prepare design specs and implement software components, interfaces and services based on this design.
- * Involved in the designing of pages and to verify all the pages are tagged to proper site category.
- * Involved in creation of Master pages.
- * Involved in unit testing and developed documentation for the system.
- * Was in the 2nd tier support during the maintenance of the application.

Environment: C#, ASP.NET, ADO.NET, HTML, JavaScript, SQL, IIS 5.0, SQL Server 2000, Windows 2000/NT

UK

NOV2001 –MAR 2002

Junior .NET Developer

Project: Project Tracking System

This system deals with the internal project management tasks of the company. It provides information about the various projects currently being dealt by the company. The administrator can view the status of the projects and details of the staff whoever involved in the projects. The administrator has privilege to prioritize a particular project and he can assign a task to any member of the staff. Each member of the staff has to update their daily work details, which can be viewed by the administrator.

Responsibilities:

- * Responsible for database management and database connectivity.
- * Creating and maintenance of employee and project details of the company.
- * Involved in designing User Interface.
- * Responsible to prepare design specifications and implementation of software components, interfaces and services based on the design.
- * Involved in the lifecycle of software development and responsible in developing and reviewing the technical documentation.
- * Involved in quality checking, debugging and implementation of web forms.

Environment: C#, ASP.NET, ADO.NET, HTML, JavaScript, SQL, IIS 5.0, SQL Server 2000, Windows 2000/NT.

Leyon Ltd,

UK

FEB 2001 – OCT2001

Junior .NET Developer

Project: justeat.com

To make a B2C website which contains Contact us, about us, online registration, Auto email system, Member directory etc...Justeat.com is the biggest portal/internet shop when it comes to ordering food online from various restaurants in Europe. The choice of restaurants and food on Just–Eat ranges from a la carte restaurants to the local pizza shop round the corner.

Responsibilities:

- * Involved in designing User Interface.
- * Developing and implementing of website with static images, graphics, auto–responders and feedback forms.
- * Involved in the lifecycle of software development including responsibility for the development and review of technical documentation.
