point.*

Try changing LPOLESTR to BSTR.

You should also add "oleautomation" to your interface's attribute list.

This

should generate warnings for you at compile time for most issues that are
likely to cause problems with VB.

A list of which parameter types are oleautomation compatible can be found
here:

http://msdn.microsoft.com/library/default.asp?url=/library/en-us/automat/htm/chap8_9a9a.asp

Adelle.
