Hello John,

For the '501 Not Supported' error of WebDAV PUT request, please check if the server has been installed with IIS Lockdown and URLScan. If so, you'd remove PUT from [DenyVerbs] section in URLScan.ini .

326444 How to configure the URLScan Tool
<http://support.microsoft.com/?id=326444>

Also please refer to the following article to check if the DisableWebDAV property has been set to 1 in registry. If it is, please change it back to 0 and restart IIS to test again.

241520 How to Disable WebDAV for IIS 5.0
<http://support.microsoft.com/?id=241520>

We are looking forward to your update.
Best regards,

WenJun Zhang
