Hi Bob,

In addition to Ken's suggestions, "running total" fields may give incorrect values if you have "Keep Group Together" set on your group. I don't know if this has been fixed in the newest versions of CR, but it has been a longtime problem. I've never understood why, though. To me, it would seem that "Keep Group Together" is strictly a visual effect. Somehow, it can cause "running total" fields to calculate incorrectly.

Bob Holmes
