Thx Steve. I can display Crstal Report in Web browser now by typing "aspnet_regiis.exe -i" under the "C:\WINNT\Microsoft.NET\Framework\v1.1.4322" path of client IIS machine.

Richard

> *If that's the literal content being returned to the browser, then it looks like the problem is with ASP.NET/IIS, not Crystal. Verify that you have the .Net Framework and ASP.NET installed on the IIS machine. If ASP.NET is installed but IIS is not recognizing the .aspx extension, run aspnet_regiis to fix the mappings.*
