Bob,

This is not for the viewer, but for the report.

PJ

Hi PJ and other NG members,

I tried to take your suggestion, but I did not find the  
EnableParameterPrompting property in the viewer object. At least  
"Intellisense" did not present this property when I entered:  
crystalReportViewer1. I got the following error from the compiler:  
'CrystalDecisions.Windows.Forms.CrystalReportViewer' does not contain a  
definition for 'EnableParameterPrompting' What am I doing wrong?

```
//Use the viewer object to create plannerCode & productCode parameters  
rpt1301 myReport = new rpt1301();  
crystalReportViewer1.EnableParameterPrompting = False; //what I tried to do  
//Step 1: assign report object to viewer  
crystalReportViewer1.ReportSource = myReport;  
//Step 2: reference parameterFields collection
```

Cheers,

Bob
