Hi Newsgroup,

Visual Studio 2003, VB.NET, SQL-Server 2000, Crystal Reports:

in the designer everything seems fine: my boxes appear as a circle after formatting the corner rounding.

But in the Report viewer, they are square boxes again, or, if they don't have a line, they disappear.

Does it not work with every printer ?  
Or what else could be wrong?

Liz

.
