Hi All,

How do I check a fields value in Details view. This does not work.

```
If Me.DetailsView1.Fields.Item(6) = True Then  
'do something  
End If
```

It complains with the following error.

```
Error 1 Operator '=' is not defined for types  
'System.Web.UI.WebControls.DataControlField' and  
'Boolean'. H:\Programming\Web\MSF_OP_Compliance_New\OP_Comp_Detail.aspx.vb 8 12  
H:\...\MSF_OP_Compliance_New\
```

Thanks

.
