This newsgroup rarely gets answers – few people hang out here.

If you want to increase your chance of an answer then use one of the following:

The official Microsoft Managed DirectX newsgroup
<news:microsoft.public.win32.programmer.directx.managed>

The official Microsoft gaming forums which is also the best place for XNA questions (note that VB and XNA are not supported by Microsoft but some community members have some things working)
<http://forums.microsoft.com/MSDN/default.aspx?ForumGroupID=20&SiteID=1>

The gamedev.net directx forum
http://www.gamedev.net/community/forums/forum.asp?forum_id=10

****PLEASE**** choose one and post there, do ***NOT*** post the same question in all 3 places. Your question will not be answered any quicker and you will just annoy the people who answer the questions when they have to read the same post multiple times.

****PLEASE**** read this <http://www.catb.org/~esr/faqs/smart-questions.html> before you post anywhere.
