<news:%23izcz75jGHA.5036@xxxxxxxxxxxxxxxxxxxxxxxxxxxx>

I am having a problem in my vb6 application when I try to connect to sql server 2000 personal editon with the following connection string.(I am using windows XP professional service pack 2. and VB6 and installed sql server on the same system)

```
db.Open "Provider=sqloledb;Data Source=HAMEED;Initial Catalog=NTL;User Id=sa;Password=;"
```

the error message is :

```
"Run time error '-2147467259 (80004005)';  
login failed for user 'sa' . Reason: Not associated with a trusted SQL  
server connection.
```

When I check with the server the server is running fine and I can open every table of the database NTL.using SQL server enterprise manager.

can anybody help me in this regard.

Thanks in anticipations.

Abdul Hameed

This only means one thing. The user "sa" is not an user in the local machine.

Do you have an user named "sa" in your computer or in your company?
