hi all.i have two listview's and i add items from one listview to another.i have the code below:

```
Private Sub Command3_Click()  
Dim i As Integer  
For i = 1 To ListView1.ListItems.Count  
If ListView1.ListItems(i).Selected Then  
ListView2.ListItems.Add , , ListView1.ListItems(i).Text,  
ListView1.ListItems(i).Icon  
End If  
Next i  
For i = ListView1.ListItems.Count To 1 Step -1  
If ListView1.ListItems(i).Selected Then  
ListView1.ListItems.Remove (i)  
End If  
Next i  
End Sub
```

The problem with the above is when the form gets loaded for the first time,the first item in the listview is moved to the second listview,without selecting the item, when i click the command button. if i place a breakpoint on "If ListView1.ListItems(i).Selected Then " the value shown is TRUE....but i have not at all selected the listviewitem....

how can i solve this problem?????

please help me out....

thanks in advance

---
