Harold Druss wrote:

My question is if how could I remove all files and folders beyond a given path.

Assuming you're not writing the Next Great Virus, the answer would be "methodically, from the bottom up." There are any number of samples on drilling through the file system. For a pure VB answer, see <http://vb.mvps.org/samples/DirDrill>

Isn't the OP just talking about subfolders? Doesn't SHFileOperation delete them as well? Might need to specify some options for it, such as the one for answering yes to all prompts.
