Thank you Jim. I already have Visual Basic Complete. I have recorded the ISBNs of the others and will ask my local A&R

I would class myself as very much a beginner.

This seems to provide a few links.

http://flus.cheapbooks.com/search_director.cgi?query=Visual+Basic+6&x=0&y=0

It's very strange that querying for the following failed to turn up the same thing as above.

Visual+Basic
VB

Both of those queries turned up results like each other but not anything Visual Basic 6. Very weird.

Hope it helps.
