Hi it's me again, the Pest,

in VB6, Winxp I'm printing to a picturebox and then copying that to the clipboard. It's working pretty well except when I paste the clipboard into a Word document, there's a large blank space at the bottom of the picture I just pasted. I know it can be cropped in Word but I'd like to prevent this space from being created. I've tried changing the picture .height, and ..scaleheight but don't get predictable results. Does anybody have any ideas ?

Thanks, Jennifer

The important parts of the code looks like this:

```
Picture1.ScaleMode = 0 ' 0=user 3=pixel 5=inch
Picture1.AutoRedraw = True
Picture1.Height = 15840
Picture1.Width = 15000
Picture1.ScaleTop = 0
Picture1.ScaleLeft = 0
Picture1.ScaleHeight = 8500
Picture1.ScaleWidth = 18000
Picture1.Cls
....
```

Code prints to picture, no problems
....

```
Clipboard.Clear
Clipboard.SetData Picture1.Image, vbCFBitmap
```

Then I paste to Word.

I need to stick with the ScaleMode=0 because all the code that does the printing uses that.

Problem copying PictureBox to Clipboard
