On my very new HP with Vista: ups and downs are the same, Mike.

Thanks Bert. That is also the case on my laptop (Intel Celeron). Totally different than on my main machine (AMD Athlon) on which the "count up" is very much faster than the "count down". What processor does your HP use?

My PC has an Athlon 64x2 Dual Core Processor 5200+ 2.6 GHz.
RAM: 2 GB. I should have said that rightaway.
Bert.
