Dear all,

Many Thanks to your great help. It works now with new declaration Long is not available in vb.net.

Kind regards, Alex

Dear colleagues,

I am trying to call FindWindow function but it seems not to be working. It returns a loooooong value even if the Window "SoftMaxPro GxP" is not started. I can't even find a window which is open. What am I doing wrong? Plese help...

Kind regards, Alex

Imports System

Imports System.Data

Imports System.Windows.Forms

Almost everybody in this newsgroup is using VB6 or lower. While you may get a stray answer to VB.NET (including VB2003 and VB2005 which has dropped .NET from its name) questions here, you should ask them in newsgroups devoted exclusively to .NET programming. Look for newsgroups with either the word "dotnet" or "vsnet" in their name.

For the microsoft news server, try these newsgroups...

[news://msnews.microsoft.com/microsoft.public.dotnet.general](http://msnews.microsoft.com/microsoft.public.dotnet.general)

[news://msnews.microsoft.com/microsoft.public.dotnet.languages.vb](http://msnews.microsoft.com/microsoft.public.dotnet.languages.vb)

Re: FindWindow is not working

<news://msnews.microsoft.com/microsoft.public.vsnet.general>
<news://msnews.microsoft.com/microsoft.public.vstudio.general>
<news://msnews.microsoft.com/microsoft.public.vstudio.setup>
<news://msnews.microsoft.public.dotnet.languages.vb.upgrade>
<news://msnews.microsoft.public.dotnet.languages.vb.controls>
<news://msnews.microsoft.public.dotnet.languages.vb.data>

There are some others, but these should get you started.
