-

use atl and without MFC.

could'nt show the text of center format in a cell.

exp: "\qc 12\cell"
the text "12" was gone.

how to support '\qc'

```
style;  
m_ctlRichEdit.Create(m_hWnd, rc, NULL,  
WS_CHILD | WS_VISIBLE | //WS_BORDER |  
WS_HSCROLL | WS_VSCROLL | ES_AUTOHSCROLL |  
ES_AUTOVSCROLL | ES_MULTILINE | ES_NOHIDESEL |  
ES_SAVESEL | ES_SELECTIONBAR, 0);
```

and there's no difference using this line below or not.

```
m_ctlRichEdit.SendMessage(EM_SETTYPOGRAPHYOPTIONS,  
TO_ADVANCEDTYPOGRAPHY, TO_ADVANCEDTYPOGRAPHY);
```

.
