Can anybody point me to an example that implements a list-view (report mode) where one of the columns shows a com-box ?

I've got this KB article on how to implemnt it :<http://support.microsoft.com/kb/816188> but i thought I may save some time.

any other links/info would also be appreciated,

thanks

kombat, have you been able to implement this?

Does anyone know if there are Jedi or Orpheus components that will already do this for you?

.
