

Array Bounds Errors in Purify

When I'm running my application through Purify I keep getting "Array Bounds Write Errors". For example, when I execute the following code:

```
CRecordset recSet(m_pDatabase);
recSet.Open(CRecorset::forwardOnly, _T("SELECT hos_title
from hosmas"));
```

Purify reports the following:

```
ABW: Array bounds write in MultiByteToWideChar
Writing 120 bytes to 0x022850e0 (56 bytes at 0x02285120
illegal)
CRecordset::PrepareAndExecute(void) [dbcore.cpp:2421]
else
{
    AFX_ODBC_CALL(::SQLPrepare(m_hstmt, (UCHAR*)lpszWSQL,
SQL_NTS));
}
```

This happens on EVERY database transaction that I do. My configuration is Windows XP SP1 + MDAC 2.8. I can reproduce the same issue running against Oracle (Oracle 8.1.7.7 ODBC Driver) or MS SQL Server.

Any help would be greatly appreciated as this is driving me nuts.

Thanks,
James
