I have a question regarding retrieving currently logged on user.....now i know, windows have one api called GetUserName(). Now if i use this api from my service, i get SYSTEM as the user name.....but i want to retrieve the user name of the person who is currently logged in the system....is there some other apis for that.....

With sufficient thrust, pigs fly just fine. However, this is not necessarily a good idea. It is hard to be sure where they are going to land, and it could be dangerous sitting under them as they fly overhead. — RFC 1925
