Hi,

"Sin Jeong-hun" <typingcat@xxxxxxxx> ha scritto nel messaggio
[news:1183744061.446801.186430@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:1183744061.446801.186430@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx)

I want to read a line from a .txt file (which is saved in
Unicode(UTF-8) and show the string in a MessageBox.

you might consider the routines on my web site:

<http://www.geocities.com/giovanni.dicanio/vc/index.htm>
<http://www.geocities.com/giovanni.dicanio/vc/index.htm#utf8conv>

There is also a test program, which loads and saves text lines in UTF-8,
converts them into UTF-16 and shows them into edit-boxes.

G
