AutoFlowchart Version 2.4

what's is AutoFlowchart?

AutoFlowchart v2.4, the Professional sourcecode flowcharting tool.

AutoFlowchart is a excellent tool to generate flowchart from sourcecode.Its flowchart can expand and shrink. and you can pre-define the the width , height,Horizontal spacing and vertical spacing. Move and zoom is also very easy. It can export the flowchart as a Microsoft Visio/Word file or a bitmap file. It can help programmers understand, document and visualize source code.

It supports C,C++,VC++(Visual C++ .NET),Delphi(Object Pascal).
In the future,It will support more languages.

You can use it on Windows 9X/NT/me/XP/2003.

what's new?

v2.4

1. add "project" to manage more source code files.

v2.3

1. can auto display a detail code window by double click the function/procedure name ;
2. use GDI+ to draw flowchart and draw text;
3. add search function;
4. change the arrowhead shape;
5. remove a bug when in Windows Server 2003;

v2.1 Ms Visio is supported!
